

WALKING THROUGH THE VALUES

Understanding the 038

NEW

Any comment associated with the point of call

Distance driven to each POC

A point of call which must be delivered in the am portion of a route

Distances & attributes are variable when 1 or 2 points of call (POC) share a common pathway

Delivery sequence

Total distance walked in feet & inches of individual POC from street/sidewalk to receptacle

Any comment associated with the LDU

Applicable only when CMB delivered on foot

X = CMB
G = GMB
O = Other (LDU with additional streets)

Distances & attributes are non-variable when 3 points of call or more share a common pathway/entrance

Intersecting streets

Additional street name if CMB or GMB

CMB info

"x" if applicable

Route number

of separations the LDU will occupy in the letter carrier case

Actual time

Adjustments to distance on foot for:

- Doors
- R&M receptacle
- NWP

Identify the customer's preference with regards to unaddressed admail

1 = Yes
0 = No

Consumers choice

Actual time

Total # of available apt.

Total non variable value (including street distance)

5.7 feet added for each variable NWP occurrence

5 feet added per door

4 feet removed per receptacle

10 feet removed for each NWP occurrence

Reference Material — For further reference, see LCRMS, Chapter 1
